

Street Medicine
Instructor Course

TRILOGY

Course Overview

The Street Medicine Train the Trainer program is a three-day information packed dynamic presentation of essential skills and best practices aimed towards the Law Enforcement Officer and other first response personnel. Day one is the provider course with days two and three devoted to Instructor certification.

This program is based upon U.S. DOD Tactical Combat Casualty Care (TCCC), the Hartford Consensus Meetings I, II, and III, and the guidelines presented by the American College of Emergency Physicians' Committee on Trauma.

The Provider course presentation topics include:

- Tactical Patient Assessment
- Controlling Bleeding
- Basic Airway Management
- Ballistic, Blast, and Less-Lethal Weapons Injuries
- Patient Extraction and Evacuation

Students will be given the opportunity to learn and practice the skills necessary to provide effective medical intervention for various medical emergencies.

Hands-on skills include:

- Rapid trauma assessments
- Insertion of nasopharyngeal and oropharyngeal airway devices
- Management of sucking chest wounds
- Bleeding control techniques using hemostatic agents, combat dressings, and combat applied tourniquets (CAT).
- Managing patients with body armor in place
- Techniques for casualty relocation to safer environment. Various drag, carries, and lifts.

Sample Provider Course Agenda
