Every Second Counts

Death From Uncontrolled Bleeding Can Occur In As Few As 3 to 5 Minutes

Trauma is a national health problem and after a traumatic injury, bleeding is responsible for over 35% of pre-hospital deaths. Examples of trauma include traffic & industrial accidents, natural disasters, falls, accidental injuries and intentional acts of violence such as shootings, stabbings and bombings. These types of injuries often result in uncontrolled bleeding. Without intervention these injuries can result in death within minutes – even before emergency medical services or other first responders can arrive.

North American Rescue is leading the way to equip bystanders and initial first responders with the essential medical gear needed to take immediate action in life threatening emergencies. These lifesaving modular aid components are designed for individuals or groups in public buildings and populated public areas to administer immediate bleeding control at the point of wounding.

For more information on Public Access Bleeding Control Products visit www.NARescue.com
Prepare yourself and your community for the unexpected – lives are depending on it...
Each Individual Bleeding Control Kit Contains These 7 Items:

- Identify & Cover the wound
- Apply Direct Pressure until Bleeding is controlled
- Wrap Wound with ETD (See next Step)
- Place Pad over the Wound
- Wrap around the Limb, covering the pad
- Secure with velcro style fastener when wrap is complete

Nylon Kit Bags Offer:

- Essential equipment needed for persons to take action as immediate responders in helping to stop and/or control life threatening bleeding
- Easy to restock in cases of use
- Convenient to carry and easy to open in stressful situations
- Opens flat for ease of use and immediate identification of enclosed devices
- Easily recognizable red nylon bag with attached PVC Bleeding Control Patch
